Organization
Leadership
Management
Customer Service

Objective

Talented individual seeking to make a career transition to the coding industry to leverage six years of experience in customer service and relationship management.

Experience

12/2020 - Present

Student • Denver University • Full Stack Web Development

While attending Denver University I learned how to create a full stack web application using the MERN development stack. I am eager to help contribute to a development team with my newly acquired skills.

8/2019 - 12/2020

Electrician • Third Year Apprentice • Custom Electrical Contractors

Responsible for forming and executing plans to complete projects on time with 100% accuracy. This includes building and managing relationships with clients and inspectors during walkthroughs and project update meetings.

2/2015 – 3/2017

Store Manager • Leadership • GNC

Responsible for an extremely detailed inventory list, conducted payroll, and created the store schedule – all while building and maintaining client relationships through impeccable customer service. Through exceptional communication skills, consistently maintained position as the store's top salesperson. As a team manager, instrumental in training all new associates on GNC product knowledge and performing mock sales sequences to drive increase in revenue.
